Effective June 4, 2025, U.S. Customs and Border Protection (CBP) began collection of the 50% import duty on certain imports of aluminum articles and derivative aluminum articles from all countries (UK remains at 25%). This additional duty is based on the value of the aluminum material in the product. If you are unable to provide the value of the aluminum content in the product, then the total value of the item will be subject to the additional 50% duty rate. For derivative aluminum products processed in another country from aluminum articles that were smelted and cast in the United States the 232 duty rate is 0%. Effective June 28, 2025, if you are unable to determine the country of cast and smelt, CBP has directed that importers must report Unknown "UN" and pay a 200% duty instead of the 50% duty. Importers may submit a post-summary correction to update the country of smelt or cast when they obtain information on the actual country(ies) of smelt or cast.

For more information on the additional Sec 232 reporting requirements please visit the [CBP FAQ on Section 232](#). If you have questions regarding Section 232 Steel and Aluminum provisions, please contact our Compliance Team at compliance@medey.com.
